AGRICULTURE INDUSTRY ADVISORY COMMITTEE**

Developing a Plan of Work for 2009/10

Summary

1 This paper invites members to participate in the development of the Agriculture Industry Advisory Committee (AIAC) plan of work for 2009/10.

2 The aim is to develop a plan of work that supports the Health and Safety Executive's Strategy, the Agriculture Revisited Initiative and other core work and that includes specific commitments to be delivered by AIAC members and other stakeholders.

Background

3 A small Planning Working Group met on 11 February 2009 to take the first steps in developing a plan of work. Written contributions were received from members unable to attend the meeting and these were duly considered by the Group. A separate note of the meeting is available.

4 The Group identified five key elements for a plan of work. Although the plan of work is focused on what can be delivered in the next 12 months, it has been drafted in the context of longer term efforts that apply to many of the topics.

Action

5 Members are invited to comment on the draft plan of work and identify where and in what way they can contribute to support effective delivery of the five elements contained in the plan.
