

APPLICATION FORM FOR NOTIFICATION OR AUTHORISATION OF BIOCIDAL PRODUCT RESEARCH

This form should be completed when applying for Notification or Authorisation of research under Regulation 16 or 17 of the Biocidal Products Regulations 2001 (as amended).

Completed forms should be sent to:

Biocidal Product Authorisation team,
 Redgrave Court,
 Chemicals Regulation Directorate,
 Health and Safety Executive,
 Bootle,
 Merseyside
 L20 7HS
 Email: pa.biocides@hse.gsi.gov.uk
 Fax 0151 951 3317

Contact Details and declaration	
Name, address, email address, telephone number of applicant	
The information supplied is to the best of my knowledge true and accurate.	[Name and signature of applicant]
Name and address of organisation supplying product for use in the UK	
Name of person in organisation receiving and testing the product	
Name and address of organisation testing the product	
Active substance(s) in the biocidal product	
Common name	
IUPAC name	
CAS number	
Status under the Biocidal Products Directive review programme (Included on Annex 1/New active/Existing active still being reviewed)	

Hazard Classification of the active substance according to the CHIP Regulations	
Maximum and minimum concentrations of active substance in the biocidal product	
The maximum quantity of active substance to be used in the tests (weight)	
Biocidal product to be tested	
Name of biocidal product	
Formulation type	
Biocidal product type	
Target organisms	
Location(s) of testing (site address and Ordnance Survey map reference number)	
Application method	
Will the product be restricted to indoor application?	
Who could be exposed to the product e.g. professional users, bystanders, non-target organisms?	
List any control measures to reduce exposure of users, bystanders and non-target organisms	
How will unused product or treated materials be disposed of?	
What is the purpose of the research (e.g. to generate efficacy data)?	
Projected start date for testing	
Projected end date for testing	
Other information	
Please provide the hazard classification of the product according to the CHIP Regulations and any additional information on the biocidal product or active substance relevant to possible effects on the health of humans or non-target species, or on the environment (e.g. physicochemical properties, mammalian toxicological and ecotoxicological information). This may be in the format of a Material Safety Data Sheet.
