Prosecutions	7
Technical Note	8

Summary

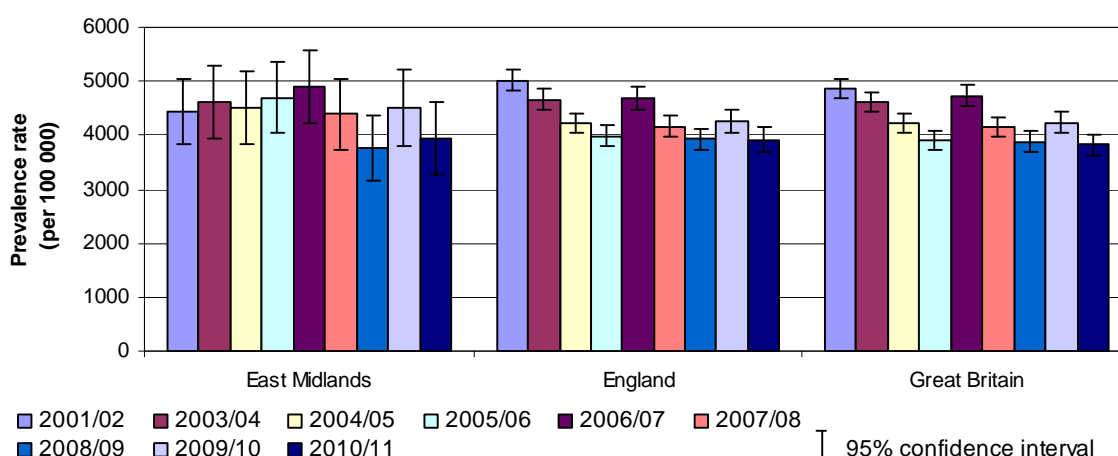

The information in this document relates to Health and Safety statistics in the East Midlands in 2010/11p. The document can be found at: www.hse.gov.uk/statistics/regions/eastmid/

- The latest information for the East Midlands shows a downward trend in workplace injuries but no clear trend in rates of work-related ill health.
 - **Ill Health:** 89 000 people suffered from work-related illness, a rate of 3 900 per 100 000 people working in the past 12 months (LFS).
 - **Injuries:** There were 9 735 reported injuries to employees, a 3.9% decrease from the previous year (RIDDOR).
 - **Injury rates:** Total rate of reported injury fell to 550.8 per 100 000 employees, compared to a five year average of 596.0 (RIDDOR).
 - **Working days lost:** 2.4 million working days were lost due to workplace injury and ill health, 1.3 days per worker (LFS).
 - **Enforcement:** HSE inspectors issued 781 notices and prosecuted 60 cases, 56 of which led to a conviction.

III Health

- The latest information for the East Midlands shows:
 - In 2010/11, an estimated **89 000 people in the East Midlands**, who worked in the last year, believed they were suffering from a work-related illness, according to the Labour Force Survey (LFS).
 - This equates to a **prevalence rate** of 3 900 per 100 000 people (3.9%) working in the last 12 months.
 - The prevalence rate was of a similar order (not statistically significantly different) to that in 2001/02, the earliest year for which comparable data is available.

Estimated prevalence rates of self-reported illness caused or made worse by work, per 100 000 people working in the last 12 months

Injuries

- The latest information for the East Midlands shows:
 - **Fatal injuries:** there were 16 fatal injuries to workers in 2010/11.
 - **Major injuries:** there were 2 027 major injuries to employees in 2010/11p.
 - **Over 3 day injuries:** there were 7 699 over 3 day injuries to employees in 2010/11p.
 - **Injury rates:** the rate of injury for fatal and major injuries was 115.2 per 100 000 employees, compared with a national average of 100.4. The rate of injury for over 3 day injuries was 435.6 per 100 000 employees, compared with a national average of 366.4.
 - **Annual trend:** compared with the previous year, injuries in the East Midlands have fallen by 3.9%.

Working days lost

- The latest information for the East Midlands shows:
 - In 2010/11, an estimated 2.4 million days were lost (full-day equivalent) to workplace injury and work-related ill health.
 - This equates to an average annual loss of an estimated 1.3 days per worker.

- For more detailed information relating to working days lost at a regional level, please refer to:
www.hse.gov.uk/statistics/lfs/wdlgor.xls

Prosecutions

- The latest information for the East Midlands shows:
 - HSE prosecuted **60 cases**, with at least one conviction achieved in 56 cases (93%).
 - HSE prosecuted **107 offences**, 84 of which led to a conviction.
 - Duty holders found guilty of health and safety offences received **finances totalling £1 321 715**, an **average fine of £15 735 per offence**.
 - Local authorities prosecuted **9 cases**, all of which resulted in at least one conviction.
 - Local authorities prosecuted **20 offences**, all of which led to a conviction.
 - Duty holders found guilty of health and safety offences received **finances totalling £275 800**, an **average fine of £13 790 per offence**.

- For more detailed information relating to enforcement action taken by HSE and local authorities at a regional level, please refer to:

www.hse.gov.uk/statistics/regions/regenf.xls

N.B. In Scotland HSE and local authorities investigate potential offences but cannot institute legal proceedings. HSE and local authorities send a report to the Crown Office and Procurator Fiscal Service (COPFS). COPFS makes the final decision whether to institute legal proceedings and which offences are taken. For more information, please see www.hse.gov.uk/statistics/sources.htm#enforcement

Technical Note

- The injury statistics summarised in this regional report are based on RIDDOR reports and exclude injuries reported to HSE's Railways Inspectorate (and from April 2006 the Office of Rail Regulation [ORR]), and records where the Local Authority location is unknown.
- p provisional

Technical note on injury rates for counties and local authorities

- RIDDOR injury data for counties and local authorities (LA) are presented as rates per 100 000 employees. These rates allow comparisons to be made between different areas. However, the following points should be taken into account:
 - Research shows that differences between injury rates at regional / local level are strongly influenced by variations in the mix of industries and occupations; for example, some LAs contain large employers in riskier industries.
 - The local area rates will also be affected by different levels of reporting of RIDDOR (this effect is reduced by looking at employees only, i.e. excluding the self employed).
 - The data only relate to injuries reported under RIDDOR, since other sources - e.g. the Labour Force Survey - do not generally permit examination at this level of detail.
- A detailed table gives rates separately for fatal and major, over-3-day and total injuries, and showing each of the five years 2006/07 to 2010/11p.
- These are summarised in a map, for each Government Office Region, Wales and Scotland, which shows the total employee injury rate (2006/07-2010/11p) for each LA district. The figures are colour-coded to show where they lie in the overall distribution of injury rates among the 380 LA districts in Great Britain.
