<b>Open Government status: Fully Open</b>	<b>Paper Number: MISC/05/04</b>
	<b>Meeting Date: 8 February 2005</b>
	<b>Type of Paper: Miscellaneous</b>
<b>Exempt material: None</b>	<b>Paper File Reference: SASD/221/1015/04</b>
	<b>Intranet embargo?: No</b>

**HEALTH AND SAFETY COMMISSION**

**Progress of the Review of the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1995 (RIDDOR)**

**A Paper by Jonathan Russell, Policy Group,  
Cross-cutting Interventions Division 2**

**Advisor(s): Graham Holder and Francis McGuigan**

**Cleared by Giles Denham, Director of Policy Group and Jonathan Rees, Deputy  
Director-General (Policy) on 26 January 2005**

**Issue**

1. To update the Commission on the progress of the Review following a stakeholders Public Forum meeting held on 20 January 2005.

**Timing**

2. Routine.

**Recommendation**

3. That Commissioners note the current position.

**Background**

4. Please see MISC/05/03 dated 18 January 2005.

### **Argument**

5. On 20 January, HSE held a stakeholders Public Forum meeting to discuss HSE's plans for a Consultation Document (CD). The meeting, chaired by Jonathan Rees, took place at the Institution of Civil Engineers. 22 key stakeholders (see **Annex 1**) had an opportunity to express their views on the draft CD and options for change.
6. The meeting was positive and constructive but no consensus was reached on a clear way forward for the Review. It was agreed that the following key issues needed to be addressed in the CD but there were different views on their priority and importance:
  - HSE and local authorities needed to be clear about the objectives of the Regulations and what the enforcing authorities needed from RIDDOR rather than what they wanted - by doing this, they would gain acceptance from stakeholders;
  - the Review must avoid becoming too focussed on the needs of the enforcing authorities;
  - the legal requirement to record information was at least, if not more, important than the requirement to report – a balance was required between the need to record information on incidents in a flexible way and thresholds for reporting; and
  - the CD should look at whether:
    - occupational ill health should continue to be reported under RIDDOR;
    - 'at work' work-related road traffic incidents should be made reportable under RIDDOR; and
    - the collection of statistical information should be 'disconnected' from other RIDDOR objectives.

Commissioners may also have views on these issues.

7. Although these issues were agreed, there was no clear agreement or consensus on a way forward. Different stakeholders were looking for different solutions to address these issues.

### **Financial/Resource/Environmental/Other Implications for HSE**

8. None at this stage.

### **Action**

9. Commissioners are asked to note the current position. It is hoped to present a paper covering a formal CD to the Commission in March/April.

**RIDDOR PUBLIC FORUM – 20 JANUARY 2005 - LIST OF ATTENDEES**

<b><u>Non-HSE</u></b>	
Ms V Gracie-Landrick	Local Authorities Coordinators of Regulatory Services (LACORS)
Dr J Asherson	CBI
