DISEASE REDUCTION PROGRAMME: SKIN DISEASE

OBJECTIVE

By 2010, to reduce the incidence rate of occupational chemical-induced skin disease by 20-30%, relative to the year 2000
DISEASE REDUCTION PROGRAMME: SKIN DISEASE

Issues:
• Measuring the baseline
• Deciding what to try to do to achieve the objective
• Doing it
• Measuring its effectiveness in achieving the objective
DISEASE REDUCTION PROGRAMME: SKIN DISEASE

Issues for WATCH?

• **Measuring the baseline;** problems with current UK statistics; research ideas for improving them; robustness of final position taken

• **Deciding what to try to do to achieve the objective;** logic behind choosing priorities for resources/action; planned actions

• **Doing it;** ?

• **Measuring its effectiveness in achieving the objective;** means of measurement; robustness of measures
