

# **Reported Livestock injuries (cattle) 2002/03 – 2007/08p**

# Caveat

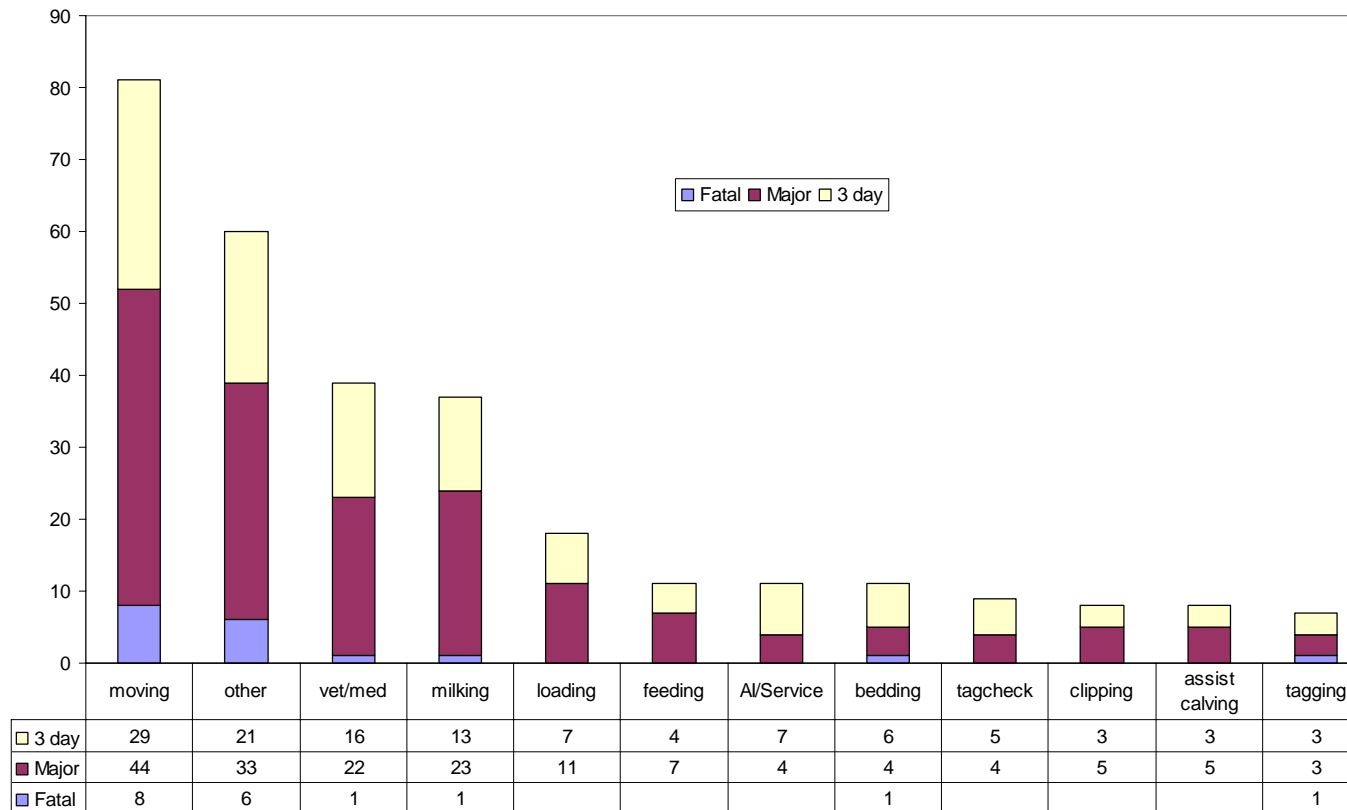

---

- The following slides contain analysis of RIDDOR reported cattle handling incidents based on activities indentified from notification comments made to the Incident Contact Centre (ICC).
- RIDDOR notifiers have freedom to express the details they supply in the way that they feel is most appropriate. As a consequence of the flexibility allowed during notification, it is very difficult to group together reports that describe specific activities or a chain of events leading to an injury, hence there is no easy way of ensuring that all records are accounted for.

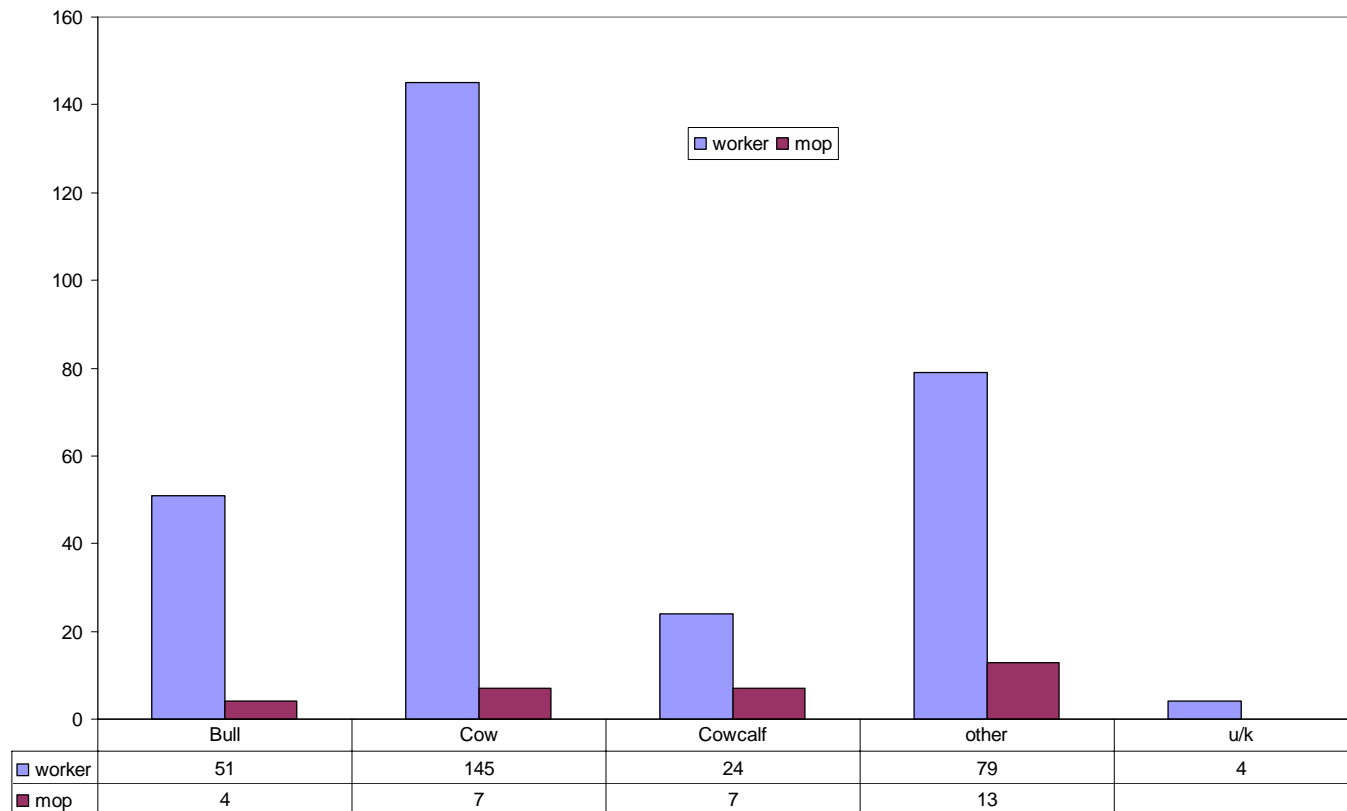

Reported incidents 2002/03 to 2007/08p - by activity

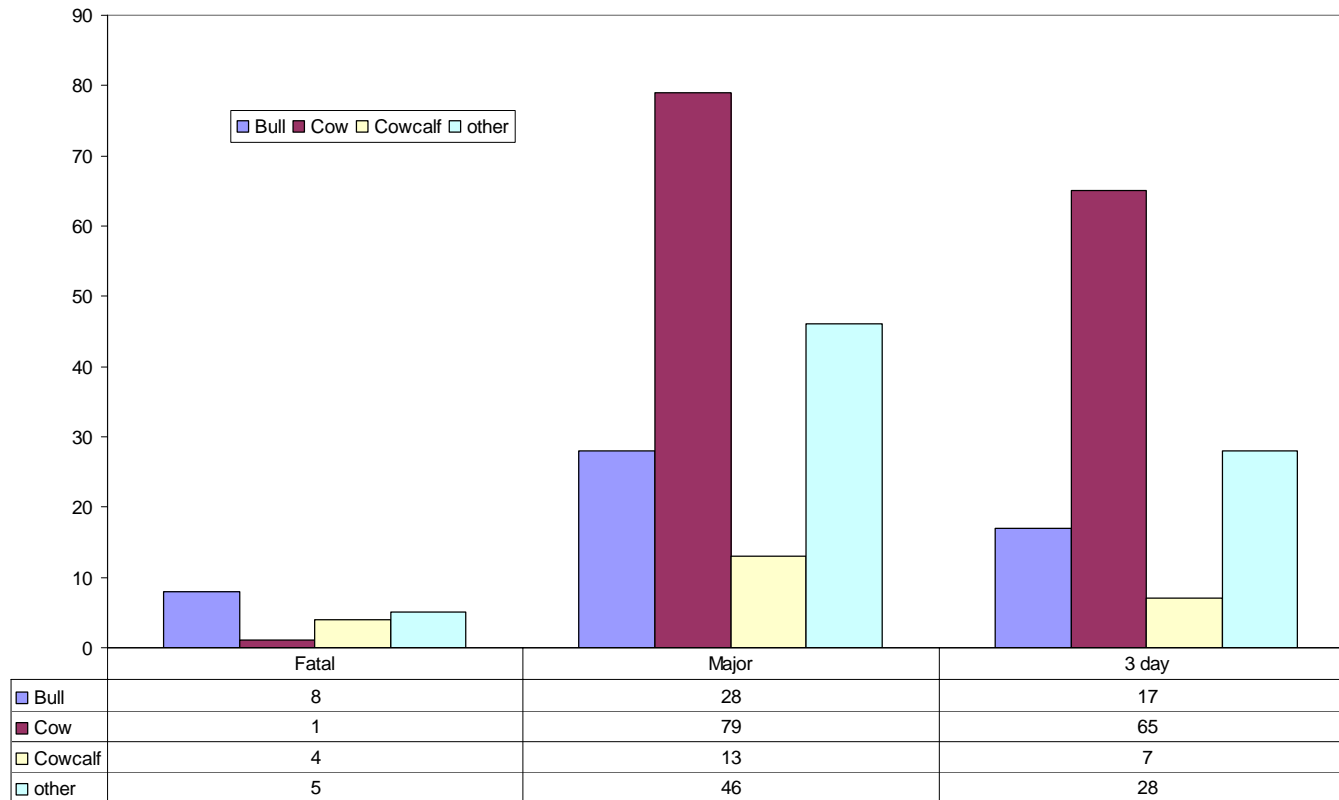

Activity vs severity - workers

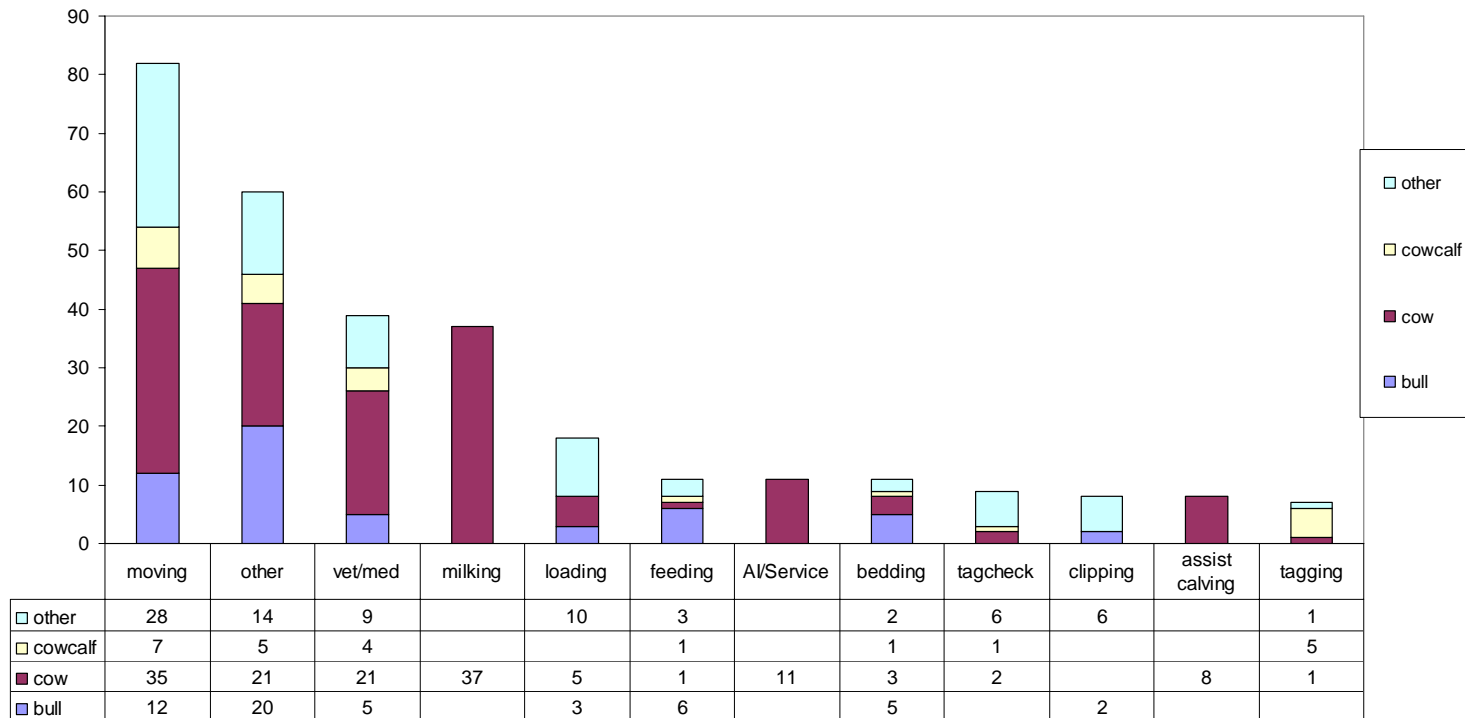

Animal type - workers and MOPs

### Animal vs severity - workers
