

IWPPA SUMMARY FOR PABIAC MEETING 13th NOVEMBER 2007

The accident record of IWPPA members continued to improve over the past 12 months. The twelve month rolling total incident rate has fallen from 33.76 to 5.83 per 1,000 employees. Actual numbers of accidents are summarised as follows:

PERIOD	MAJOR	MINOR	TOTAL
Sept 05 – Aug 06	2	14	16
Sept 06 – Aug 07	0	7	7

Monthly data is collected from 40 members totalling about 1200 employees. The response rate is typically 90 – 95%. This does not include data from those IWPPA members who are also members of the CPI, this information is included with the CPI results.

We are currently in the process of canvassing members concerning their progress opposite PABIAC's five strategic objectives, in preparation for the review next March.

There is nothing further to report on member's use of the various H&S tools.

The IWPPA continues to support members by supplying health and safety related information via our new members only website and on an individual basis as and when requested.
