

Improving worker involvement – Improving health and safety

HSC/E Consultative Document 207

Zoe Woodrow

Worker Involvement Programme

Worker Involvement

- Worker involvement is at the very heart of sensible health and safety management
- Effective worker involvement can reduce accidents and ill health
- Because:
 - Better risk controls (workers know what *really* happens)
 - Better buy-in to risk controls

The Three Pillars

- **Legislation** setting standards that we can build on
- **Guidance** on good practice, helping employers and workers to reach at least these standards
- **Encouragement** to try towards best practice, where the biggest rewards are to be found

Documents

- Consultative Document 207: *Improving worker involvement – Improving health and safety*
- 7-page summary document introducing the issues being consulted on
- Reply form: on-line; by email or post
- Consultation closes 8 September 06
