

## Do you need asbestos training?

HSE and asbestos training providers are working together to promote and provide a number of free asbestos awareness training places.

If you work on buildings built or refurbished before the year 2000, asbestos could be present. You will need awareness training so you know how to avoid the risks.

Each week, approximately 20 tradespeople die from asbestos-related diseases. Don't be one of them.

From September to November 2011, training providers will be pledging and delivering free training sessions at a place near you.

Visit [www.hse.gov.uk/asbestos/training-pledge.htm](http://www.hse.gov.uk/asbestos/training-pledge.htm) to find out how to book your free training.

It is your responsibility to ensure that the training provider is competent to provide the training on offer. Training courses have not been independently audited by HSE and HSE does not endorse any products or services from companies involved with this initiative.
