

Falls from a low height can be a high risk.

Last year, over 2000 people had serious accidents while working at low height. Most needed a long time off to recover from injuries such as a broken collarbone. Make sure you plan ahead so your workers know how to use equipment safely at any height. For advice visit [hse.gov.uk/falls](https://www.hse.gov.uk/falls) or call HSE Infoline on **0845 345 0055**.

Protect your business from falls.
