

# Height Aware Campaign

# Case study

# Housing Association

- **Need to access height for a variety of tasks**
- **Spending £75000 per year on Scaffolding**
- **Putting 2 or 3 workers at risk for one person to work safely**
- **Time consuming to erect**
- **Often very short duration tasks**
- **Inconvenience to householder**
- **Security risk trespass/kids**

Need to carry out a variety of **TASKS** on their domestic housing stock including Roof/chimney repair, gutter cleaning, TV aerial installation etc

HOUSING ASSOCIATION USED SCAFFOLDING CONTRACTORS TO PROVIDE SCAFFOLDED ACCESS TO HOUSES BUT FOUND SEVERAL DISSADVANTAGES INCLUDING,

**COST** £75000

**2 OR 3 PUT AT RISK** to erect scaffold for one person to work safely

**INCONVINIENCE** to householder eg can't park car in drive

**SECURITY RISK** As often left overnight or over weekends

# Solution, purchased a MEWP

Purchased a MEWP for £40,000 which included operator training

Trailer mounted so easy to transport to site.

Caterpillar track ON MEWP so easy to move into position.

# Versatile

Only 1 metre wide so fits through tight gaps before outriggers are deployed

# Safe access

Outriggers allow safe deployment up to chimney top level.

## Cost saving within first year

Allows safe access for minor roof/chimney repair, gutter cleaning, painting, window repair/replacement, TV Aerial installation, flue liner inserts during gas appliance work etc

### COST SAVINGS WITHIN FIRST YEAR OF PURCHASE

Looking to contract out the service to earn extra revenue.
