Subject: Cruiser OSR and Modesto - OSR damage photos
Attachments: Larvae in stem and leaf - winter OSR, spring 2015, Cambridgeshire; Summary 19Sept14.pdf

Hi [REDACTED]

I understand Bayer and Syngenta are working on the supplementary information and will send it to me to forward to you. I have reiterated the need to produce it as soon as they possibly can given the opening we have this week.

I have attached some photos of flea-beetle damaged OSR plants that we have collected from our members. These should be useful in showing decision makers the impact this pest can have and therefore the need for control products to be available through these emergency authorisations.

Best wishes
