

## **LAC 67-2 rev3 - Supplementary Materials 6**

### **Potential sources of information to aid development of an intervention plan**

The following summarises the potential information sources that may be available when developing intervention plans. Data protection issues may need addressing when sharing information of this type.

#### **Sources within your Local Authority**

- LA Inspection/complaints database - risk ratings, past performance, local trends.
- Food Safety Officer observations – confidence in management, M.E.C.
- Trading standards - confidence in management, M.E.C.
- Building control - changes in business activity, M.E.C.
- Business rates - new businesses
- Registration/Licensing schemes - new businesses, changes in business activity, confidence in management
- Requests for asbestos license deferments - if unjustified they may indicate deficiencies in competence or poor practice
- Adverse Insurance Reports (AIRs) - may indicate poor management, maintenance
- Local knowledge - local sector changes, poor performers
- Community protection teams - issues identified by multi-regulatory working

#### **Sources within your local community and region**

- Local H&S Liaison Groups - Local trends, sharing good regulatory practice, methods of effective engagement, poor performing companies that operate in more than one LA
- PCTs - anonymised local work related ill health statistics, issues that span the H&S / public health boundary
- GPs - reportable cases of work related ill health, reports disclosed by patients
- CQC - identification of establishments with poor or failing management systems, issues that span the H&S / public health boundary
- Safety reps/local Trade Union contacts - worker complaints
- Local Trade Association contacts - issues of poor practice, requests for advice
- Local Media/Press - reported near misses
- Police - information regarding violence in workplace or issues from the local community safety scheme
- Local training establishments - requests for advice, joint activity, changes in local business profiles

#### **HSE sources**

- RIDDOR data - reported ill health and accidents, statistically comparisons and trends
- Labour Force Survey - societal trends may include otherwise unreported trends.
- National planning priorities - issues identified and analysed by HSE policy teams as having a national priority
- Local HSE office contacts - shared local knowledge, issues crossing the HSE/LA regulatory boundaries.
