

How are Environment Agency and HSE organising for Phase 2

Ian Streatfield

Phase 2 arrangements - building on Phase 1

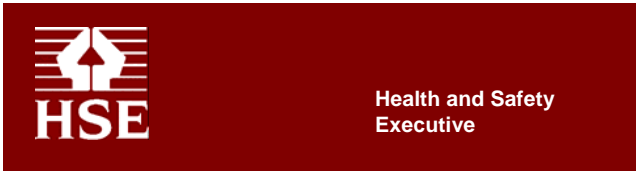

- Charging Agreements
- Interface Protocol
- Joint Programme Office

Phase 2 arrangements

- Joint working EA / NII / OCNS
- Additional resources
- Different resources

Regulatory Nuclear Interface Protocol

Ways of Working – a Shared Vision

“The roles of regulated and regulators are complementary to achieving nuclear safety and security for the UK, doing things with each other not for each other.”

Improving Regulatory Guidance

- We will be clear on our expectations. For example:
 - Long-lead items
 - Exclusions
 - Point of licensing/permitting
 - REPs (Environmental Principles)

Improving Stakeholder Engagement

- Improved website
- Greater transparency of our work
- Building Trust with Communities

New nuclear power stations

The HSE and Environment Agency are working together to make sure that any nuclear power station built in the UK meets the highest standards of safety, security, environmental protection and waste management.

New nuclear programme

Progress so far

How to get involved

View designs and make a comment

Phase 2 – How can you help ?

- Clarity on programmes
- Work with RPs on Phase 1
 - Licencees will have to close out Exclusions

Health and Safety
Executive

Environment
Agency

Summary

- We will be ready for applications
- We will enable New Build, but Operators need to give clarity on programmes and deliver quality applications
