Pesticides

Code of practice for using plant protection products

This code of practice has been prepared jointly by the Department for Environment, Food and Rural Affairs (Defra), the Health and Safety Commission (HSC) and the National Assembly for Wales Environment, Planning and Countryside Department.
This code is also available on the PSD website
(www.pesticides.gov.uk/farmers_growers_home.asp#Codes_of_Practice)
and on the Defra website (www.defra.gov.uk//)

A Welsh language version of this code is available on the NAW website (/www.wales.gov.uk//).
Printed copies of the Welsh language version are available from:

- Plant Health and Biotechnology Branch
- Animal and Plant Health Division
- Welsh Assembly Government
- Department for Environment, Planning and Countryside
- Cathays Park
- Cardiff CF10 3NZ

Biotecnoleg a lechyd Phlanhigion

**Section 1 Introduction**

1.1 How do I decide if it is necessary to use a pesticide? 15
1.2 What advice is given in this code? 15
1.3 What does this code cover? 16
1.4 What is the legal status of this code? 17
1.5 Who should read this code? 18
1.6 What other advice is available? 18
1.7 Special terms 18

**Section 2 Training and certification**

2.1 Who must be trained in using pesticides? 19
2.2 What training do I need? 20
2.3 When would I need a certificate of competence? 21
2.4 How can I use pesticides without a certificate of competence? 24
2.5 Where do I get certificates of competence? 24
2.6 What training and certificates are needed for salespeople, advisers, managers and people who draft contracts? 25
2.7 Continuing professional development (CPD) 26

**Section 3 Planning and preparation**

3.1 Making the risk of using pesticides as low as possible 27
3.1.1 Considering whether to use a pesticide 27
3.1.2 What to do if you decide that you need to use a pesticide 28
3.1.3 Choosing the right pesticide 29
3.2 The product label 30
3.2.2 Other information 30
3.2.3 Checking the approval 31
3.2.4 The label 31
3.2.5 Off-label approvals 33
3.2.6 Treated seeds, cuttings and so on 33
3.2.7 Applying a pre-prepared pesticide 33
### Contents

#### 3.3 Storing pesticides
- 3.3.2 How should I store pesticides? 34
- 3.3.3 What extra conditions apply to mobile stores? 35
- 3.3.4 Moving pesticides into and out of the store 36
- 3.3.5 Do not leave pesticide containers unattended 36

#### 3.4 The COSHH assessment
- 3.4.1 When do COSHH regulations apply? 37
- 3.4.2 When is an assessment suitable and sufficient? 37
- 3.4.3 Finding out about the dangers 38
- 3.4.4 Assessing the risks, who might be harmed and how? 39
- 3.4.5 Deciding what needs to be done to control exposure 40
- 3.4.6 Recording the assessment 41
- 3.4.7 Reviewing the assessment 41

#### 3.5 Preventing people being exposed to pesticides at work
- 3.5.2 How can exposure be prevented or adequately controlled? 42
- 3.5.3 Measures for preventing exposure to pesticides 42
- 3.5.4 Measures for controlling exposure to pesticides 43
- 3.5.5 Using personal protective equipment (PPE) 44
- 3.5.6 Suitable personal protection equipment 45
- 3.5.7 Maintaining control measures 47
- 3.5.8 Welfare facilities 48
- 3.5.9 What you need to do 48

#### 3.6 Monitoring exposure and health surveillance
- 3.6.1 When is it necessary to monitor exposure to pesticides? 49
- 3.6.2 What is health surveillance? 50
- 3.6.3 When is health surveillance necessary? 50
- 3.6.4 What else do employers need to do? 51
- 3.6.5 What about sudden illness? 51

#### 3.7 Protecting the public
- 3.7.1 Neighbouring property 53
- 3.7.2 When must notice be given? 54
- 3.7.3 Giving notice to bystanders and occupiers of neighbouring property 54
- 3.7.4 Public rights of way 56
- 3.7.5 Who should I tell if there is an incident involving pesticides? 57
- 3.7.6 Further information 57

#### 3.8 Protecting wildlife and the environment
- 3.8.1 Assessing possible negative effects 58
- 3.8.2 How can wildlife and plants be protected? 58
- 3.8.3 Specially designated areas 60
- 3.8.4 How can wild birds and mammals be protected? 61
- 3.8.5 How can bees be protected? 61
- 3.8.6 Other beneficial species 62
- 3.8.7 Livestock 62
- 3.8.8 Fish and other aquatic life 62
- 3.8.9 Wildlife incident investigation scheme (WIIS) 64
3.8.10 Preventing pesticides from contaminating surface water and groundwater 64
3.8.11 Controlling weeds in or near water 68
3.8.12 Applying pesticides from an aircraft 68
3.8.13 Invasive weeds 69

Section 4 Working with pesticides 70
4.2 Preparing to apply pesticides 70
  4.2.1 Checks to carry out 71
  4.2.2 Dangerous practices 72
4.3 Handling pesticide containers 72
4.4 Transporting pesticides 73
  4.4.1 The law 73
  4.4.2 General precautions when transporting pesticides 73
  4.4.3 Transporting pesticides inside a vehicle 74
  4.4.4 Loading and unloading pesticides 75
  4.4.5 Further action 75
4.5 Filling equipment 75
  4.5.1 Where should I fill the equipment used to apply pesticides? 75
  4.5.2 What precautions should I take when filling equipment? 76
4.6 Methods of applying pesticides 79
  4.6.1 Choosing a method 79
  4.6.2 How you should apply the pesticide to the area to be treated 80
  4.6.3 Which application methods need special precautions? 80
  4.6.4 Ground-based reduced-volume spraying 80
  4.6.5 Fogs, mists and smokes in enclosed spaces 81
  4.6.6 Fumigants 82
  4.6.7 Dusts, granules, pellets and baits 83
  4.6.8 Using vehicles without cabs 84
  4.6.9 Paved areas and public footpaths 84
  4.6.10 Using hand-held equipment 85
  4.6.11 Seed treatments 86
  4.6.12 Dipping and drenching treatments 86
  4.6.13 Weed control in or near water 87
  4.6.14 Applying pesticides from an aircraft 88
4.7 Spray drift 88
  4.7.1 The effects of spray drift 88
  4.7.2 What causes spray drift? 89
  4.7.3 Weather conditions 89
  4.7.4 How can off-target drift be prevented or controlled? 91
4.8 After working with pesticides 92
  4.8.1 What you need to do after you have applied a pesticide 92

Emergency procedures

A1 Action plans
Anyone who uses pesticides professionally (that is, as part of their job) must be trained in emergency procedures and must have, and understand, their own action plans. These emergency action plans should be kept up to date to cover new equipment or new ways of working. Many product labels will have specific advice on what to do if you are contaminated or there is a spillage or fire. This information is always on the manufacturer’s material safety data sheet (MSDS), which you can get when you buy the product.

A2 Personal contamination
You can be exposed to pesticides through your skin (usually the main route of exposure) and eyes, by breathing them in or by swallowing them. Your emergency action plan should consider how to protect the environment when you are dealing with any exposure or spillage.

If you, or people you are working with or nearby, feel unwell when you are using pesticides, or after you have used them, you should do the following:

• Stop work and, if necessary, call for medical help immediately.
• Prevent further exposure. Use appropriate personal protective equipment when helping a contaminated person or handling contaminated surfaces.
• Move the casualty away from the source of contamination and remove all their contaminated clothing.
• Wash contaminated skin or hair thoroughly with plenty of clean water.
• If eyes are contaminated, immediately flush them with plenty of clean running water. Then cover the eye with a sterile eye pad or similar lint-free dressing.
• If someone has swallowed a pesticide, do not try to make them vomit (be sick) unless the product label recommends this.
• Make the casualty rest and keep them warm.
• If the casualty is unconscious, check their breathing and pulse and put them in the recovery position. If there are no signs of breathing or a pulse, begin CPR (cardiopulmonary resuscitation), if necessary, using a method of artificial respiration which will avoid the risk of you swallowing or breathing in the pesticide.
• Give the doctor or hospital a copy of the product labels and material safety data sheets. If this is not possible, give them details of the active ingredients and the product names.
• Make sure you or someone else reports the incident to your nearest Health and Safety Executive (HSE) office. The address and phone number will be in The Phone Book or you can phone the HSE ‘Info line’ on 08701 545500. For out-of-hours emergencies, phone the HSE on 0151 9229235.
A3 Dealing with spillage

You can keep the negative effect a pesticide spillage has on the environment as low as possible by carrying an appropriate ‘spill kit’ and knowing how to use it. You must never hose down spilt pesticide or allow it to enter surface water, ditches, drains or soakaways. It is good practice to have a diagram of your drainage systems available for emergencies.

If you spill any pesticide as a concentrate, ready-to-use product or spray solution, no matter how small the spill is, you should do the following:

- Keep people and animals away from the affected area until the situation has been dealt with.
- Avoid becoming contaminated yourself. Wear appropriate personal protective equipment.
- Immediately prevent further spillage using, for example, an emergency folding pool.
- Contain the spilt material. As a priority, keep the contamination away from surface water, ditches and drains.
- Tell the Environment Agency (phone 0800 807060) and warn others at risk if the spill:
  - contaminates any water;
  - could contaminate water later, either directly or through a drainage system; or
  - contaminates a large amount of soil.
- You may need to tell neighbours or people using the water downstream of the spill.
- Tell the local water company if the spill enters a sewage system.
- For spilt liquids, put absorbent material, such as cat litter or dry sand, around the spill and use the same material to soak up the spillage. The material you use must be ‘inert’. This means it must not cause any chemical reaction.
- Sweep up any solids and material used to contain liquid spills. Sweep up as gently as possible without raising dust. Then sprinkle the area with inert absorbent material and sweep gently again.
- For leaking containers, do one of the following:
  - Use the contents immediately.
  - Pour the contents of the damaged container into an empty container that originally held the same product. The container should be in good condition and with an undamaged label.
  - Put the leaking container into a suitable larger container clearly labelled with the product name and the hazard classification and risk and safety phrases shown on the product label.
- Never put any pesticides into an empty food or drink container.
- Dispose of all contaminated material safely and legally (for example, through a licensed waste-disposal contractor). This includes getting rid of any equipment which you used to clean up the spillage and which cannot be decontaminated safely.
A4 Suspected animal poisoning

If you find a creature or animal which you suspect has been affected by being exposed to pesticides, or if you find spilt pesticide or unprotected baits, you should do the following (as appropriate):

- Get the animal away from the source of contamination, taking care not to be contaminated yourself. If necessary, wear appropriate personal protective equipment.
- Take the animal to a vet or contact a vet immediately, keeping the animal sheltered and resting.
- If possible, give the vet the product labels. Otherwise, give the name of the products and their active ingredients.
- Phone the Wildlife Incident Investigation Scheme (WIIS) on 0800 321 600 for an incident involving any creature (except fish). This means not only wild mammals, birds and pets but also bees or other insects, worms and other creatures.
- For incidents involving fish, phone the Environment Agency on 0800 807060.
- Do not touch any dead animals, unprotected baits, pesticides or containers, and never try to unblock a badger sett or fox earth which may have been gassed.
- If it is safe to do so, cover any dead animals or pesticides until they can be disposed of or safely removed to be analysed.

A5 Fire

If you discover a fire that involves pesticides, you should do the following:

- **For small fires** which you can deal with quickly, safely and without causing a significant risk of exposure to fumes or other material produced by burning pesticides, use appropriate firefighting equipment.
- **In all other circumstances**, call the fire brigade and the police, and follow your evacuation procedures. Warn other people who may be at risk (for example, if fumes are blowing in their direction).
- Give the fire brigade a complete and accurate list of the products involved and their active ingredients.
- Deal with any spilt pesticides resulting from the fire or firefighting activities as described above.
Foreword

A message from Lord Bach, Minister for Sustainable Farming and Food, and Carwyn Jones AM, National Assembly for Wales Minister for Environment, Planning and Countryside

‘We are happy to give our full support to the new Code of Practice for the Safe Use of Plant Protection Products for England and Wales. The ‘Green Code’ (Code of Practice for the Safe Use of Pesticides on Farms and Holdings) has been an important source of practical advice for farmers and growers on how to use pesticides safely and, by doing so, to meet the legal obligations which cover the use of pesticides. However, a revision has been needed for some time.

The new Code reflects Government policy to reduce to the lowest possible level the effect of pesticide use on people, wildlife, plants and the environment while making sure that pests, diseases and weeds are effectively controlled. Many of the environmental protection schemes launched under the Voluntary Initiative represent current best practice and the benefits of these and other measures are explained in the Code.

As well as bringing the advice in the ‘Green Code’ up to date, we have taken this opportunity to widen the scope of the Code to cover all plant protection uses of pesticides. By doing this, we have aimed to produce a single publication which will be relevant and of practical value to all professional users of pesticides in agriculture, horticulture, amenity situations and forestry.

We would like to thank everyone who has contributed ideas and comments both before and during the public consultation period. Together, we believe, we have produced an up to date and readable document which will encourage best practice whenever plant protection products are used.’

Notices

C1 General notice under Food and Environment Protection Act 1985 and the Health and Safety at Work etc Act 1974

This code comes into effect on 15 December 2005. On that date it will replace all previous editions of the Code of Practice for the Safe Use of Pesticides on Farms and Holdings.

It will also replace:

- parts of the approved code of practice for the safe use of pesticides for non-agricultural purposes that relate to using pesticides in amenity and forestry situations; and
- the voluntary code of practice for the use of pesticides in amenity and industrial areas

C2 Notice of issuing this code under section 17 of the Food and Environment Protection Act 1985

This code of practice has been prepared for professionals who use plant protection products. It gives practical guidance on part III of the Food and Environment Protection Act 1985 (FEPA) and, in particular, the regulations under that part of the act controlling how plant protection products are used in England and Wales.

As required by Section 17 of FEPA, Ministers have consulted organisations which represent the interests of everyone concerned.
C3 Notice of this code being approved by the Health and Safety Commission under section 16 of the Health and Safety at Work etc Act 1974

Under Section 16(1) of the Health and Safety at Work etc. Act 1974 (HSWA), and with the Parliamentary Secretary (Lords) permission, the Health and Safety Commission has approved the paragraphs of this code as listed below which relate to the health and safety of people at work, or people who may be affected by the activities of people at work.

The following paragraphs of this code are approved to provide practical guidance on controlling exposure to pesticides at work under the Control of Substances Hazardous to Health Regulations 2002 (COSHH) (SI 2002 Number 2677).

<table>

The definitions in this code are also approved where they are defining words or phrases used in the paragraphs above. This code takes effect on 15 December 2005.

Signed:

Secretary to the Health and Safety Commission

22 December 2005.
C4 Notice of this code being approved under regulation 21 of the Groundwater Regulations 1998

On 19 July 2005, Defra's Secretary of State approved the paragraphs of this code listed below, under regulation 21 of the Groundwater Regulations 1998. The following paragraphs have been approved to give professionals who use pesticides (except disposing of them) practical guidance on how to prevent substances in list I of the regulations from entering ‘groundwater’, and prevent substances in list II of the regulations from polluting groundwater.
