Preparation of the work area

Ensure safe access.
Restrict access – minimise the number of people present.
Close doors. Use tape and notices to warn others.
Ensure adequate lighting.

Equipment

- 500-gauge polythene sheeting and duct tape
- Warning tape and notices
- Class H vacuum cleaner (BS 8520 – see sheet em4) if dust needs to be removed from AIB
- Low-solvent paint
- Low-pressure sprayer, brush or roller
- Bucket of water and rags
- Asbestos waste container, eg labelled polythene sack
- Clear polythene sack

Personal protective equipment (PPE)

Provide:
- disposable overalls fitted with a hood; and
- boots without laces (laced boots are hard to decontaminate).
A respirator is not normally required.

Procedure

Caution: Never prepare surfaces by sanding or rubbing down.

Check that there is no damage before starting work; if there is, see sheet a6.
Protect nearby surfaces from contamination. Cover with 500-gauge polythene sheeting and fix with duct tape to non-asbestos surfaces.
Remove dust using the Class H vacuum cleaner.
Apply the paint, preferably by low-pressure spraying. Spray using a sweeping motion.
If painting by brush or roller, do so gently and avoid concentrating on one area, to reduce surface damage.
Cleaning and disposal

- Clean the equipment and the area with damp rags.
- Put debris, used rags, polythene sheeting, paintbrush/roller and other waste in the asbestos waste container and tape it closed.
- Put the asbestos waste container in a clear polythene sack and tape it closed.
- Disposal – see sheet em9.

Personal decontamination

- See sheet em8.

Clearance and checking off

- Visually inspect the area to make sure that it has been cleaned properly.
- Clearance air sampling is not normally required.
- Get the premises owner, dutyholder or client to check off the job.

Other hazards

Work at height – see www.hse.gov.uk/falls/index.htm. Take precautions to avoid falls. Must you work from a ladder? Where necessary, erect an access platform. There may also be other hazards – you need to consider them all.

Caution:

- Don’t sweep up dust or debris – use a Class H vacuum cleaner or damp rags.
- Don’t take used overalls home.
- Don’t reuse disposable PPE.
- Don’t smoke.
- Don’t eat or drink in the work area.

Safety checklist

- Can you avoid disturbing asbestos by doing the job in some other way?
- Do you need a licence for the work?
- Always follow all legal requirements.
- Follow the task guidance sheet.
- Use an asbestos waste container.
- Dispose at a licensed disposal site.

This guidance is issued by the Health and Safety Executive. Following the guidance is not compulsory and you are free to take other action. But if you do follow the guidance you will normally be doing enough to comply with the law. Health and safety inspectors seek to secure compliance with the law and may refer to this guidance as illustrating good practice.
