The review of the MRLs for haloxyfop-P

Background

Competent authority

The review of the GB MRLs for haloxyfop-P has been undertaken by the Chemicals Regulation Division (CRD) of the Health and Safety Executive (HSE).

Basis for the review of the MRLs

MRLs for haloxyfop-P are established in Part 2 of the GB MRL Statutory Register.

The approval of haloxyfop-P expired on 31 December 2020. As haloxyfop-P is no longer an approved active substance in GB, HSE reviewed the MRLs.

Notification of the proposed MRLs

To meet the UK's international trade obligations, the measures were notified to the World Trade Organization (WTO). The WTO/SPS notification can be found at the following link:

G/SPS/N/GBR/85

The commenting period ended on 4 May 2025 and a final Reasoned Opinion was prepared.

Conclusion of the competent authority on the risk assessment

Full details of the MRL review are outlined in the Reasoned Opinion (HSE Reference Number COP 2023/00020 and COP 2023/01138): GB MRL publications spreadsheet

Decision on the MRL review

In accordance with Article 14 of Assimilated Regulation No 396/2005,[1] the MRLs outlined in Table 1 will be amended in the GB MRL Statutory Register.

The MRLs will be set in Part 2 of the Register.

Deferred Entry Period

A reasonable period should be allowed to elapse before the amended MRLs come into force in order to permit trading partners and food business operators to prepare themselves to meet the new requirements. The amended MRLs outlined in Table 1 will come into force 6 months after the date of adoption/publication of the new MRLs.

The date of adoption/publication of the new MRLs is **20 June 2025**.

The date of entry into force of the new MRLs is **19 December 2025**.

Transitional Measures

It is not appropriate to apply transitional measures to this decision.

The MRLs are being lowered as harmful effects for human health cannot be excluded and therefore the amended MRLs will apply to all goods on the market from 19 December 2025, irrespective of when they were first produced and/or placed on the market.

The GB MRL Statutory register should be consulted to verify the MRLs set and the legal provisions established

Definition of Terms

Date of adoption/publication is the date on which the decision outlined in this document is formally adopted.

Date of entry into force (enforcement date) is the date from which the new MRLs apply.

[1] Assimilated Regulation No 396/2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin

Deferred entry period is the time period between the adoption of the decision and the date of entry into force of the new MRLs. It is applied when all or some of the MRLs are lowered following an MRL review. The time period is to allow trading partners and food business operators time to adjust to the new lower MRLs. The deferred entry period is typically 6 months. However, a shorter time period can be applied to protect human health.

Transitional measures allow the previous MRL to be applied to goods produced prior to the date of entry into force of a new lower MRL. Transitional measures are only applied when MRLs are lowered for reasons other than human health concerns.

Table 1 MRLs to be amended in the GB MRL Statutory Register

(*) indicates Limit of Determination /Quantification

Changes are highlighted in bold

Date of adoption of the new/amended MRLs: **20 June 2025**

Date of publication of the new/amended MRLs: **20 June 2025**

Date of expiry of current MRLs: **18 December 2025**

Date of entry into force of the new/amended MRLs: **19 December 2025**

Notes

Part 1 of the GB MRL Statutory Register should be consulted for the full list of products of plant and animal origin to which the maximum residue levels of pesticides ('MRLs') apply.

The default LOQ MRL is 0.01* mg/kg, However, the following exceptions should be noted:

- The MRLs for citrus fruits (code 0110000), pome fruits (code 0130000), stone fruits (code 0140000), grapes (code 0151000), and bananas (code 0163020) have been set at 0.02* mg/kg reflecting the CXLs.
- Herbs and edible flowers (code 0256000) are regard as a difficult to analyse matrices and therefore the default LOQ MRL for these products should be set at 2 x 0.01* mg/kg.
- Teas, coffee, herbal infusions, cocoa and carobs (code 0600000), hops (code 0700000) and spices (code 0800000) are regarded as difficult to analyse matrices and therefore the default LOQ MRL for these products should be set at 5 x 0.01* mg/kg.
- The default LOQ MRL for honey is 0.05* mg/kg. This is based on the residue definition for plants.

Footnotes

Transitional provision

1) MRLs shall apply to radish leaves as from 1 January 2025

Fat Soluble

2) Fat soluble

MRL clarification

3) This MRL is a CXL adopted by GB in 2025

Ginger

4) The applicable maximum residue level for ginger (Zingiber officinale) in the spice group (code 0840020) is the one set for ginger roots (Zingiber officinale) in the Part 1B of the Statutory Register (code 0213040-006, equal to the one of horseradish (Armoracia rusticana) code 0213040), taking into account changes in the levels by processing (drying), according to Art. 20 (1) of Assimilated Regulation 396/2005.

Horseradish

5) The applicable maximum residue level for horseradish (Armoracia rusticana) in the spice group (code 0840040) is the one set for horseradish (Armoracia rusticana) in the Vegetables category, root and tuber vegetables group (code 0213040), taking into account changes in the levels by processing (drying) according to Art. 20 (1) of Assimilated Regulation 396/2005

GB MRL Statutory Register

The new/amended MRLs will only appear in the Register from the date of entry into force. The current MRLs will appear with the expiry date of 18 December 2025.

The GB MRL Statutory Register should be consulted to verify the MRLs set and the legal provisions established

Appendix 1: Information on the active substance

ISO common name	Acid: haloxyfop-P Ester: haloxyfop-P-methyl ester
IUPAC	Acid: (R)-2-[4-(3-chloro-5-trifluoromethyl-2-pyridyloxy)phenoxy]propanoic acid Ester: methyl (R)-2-{4-[3-chloro-5-(trifluoromethyl)-2-pyridyloxy]phenoxy}propionate
Function	Herbicide
