

Effective Adjuvant Component Nomenclature

Please complete the Declaration and Parts 1 and 2 of this form for your adjuvant product and submit with your application.

DECLARATION

I confirm that the information given is true to the best of my knowledge, information, and belief.

Signature:

Date:

Name:

Title:

Company:

Part 1

1. Please state the product name of the adjuvant and adjuvant number:

Adjuvant
product name:

ADJ Number:

2. How many effective adjuvant components are present in the product?

PLEASE NOW COMPLETE A PART 2 OF THIS FORM FOR EACH OF THE EFFECTIVE ADJUVANT COMPONENTS.

PART 2

Sheet

of

1. **Please state the full chemical name of the effective adjuvant component using IUPAC and/or CAS nomenclature.**

2. **Please state Tradenames* applicable to the effective adjuvant component.**

* Where alternative trade names are listed the components must be identical in chemical composition.

3. **Please state CAS/EC (ELINCS/EINECS) numbers applicable to the effective adjuvant component.**

* Where alternative trade names are listed the components must be identical in chemical composition.

4. **Please propose a specific chemical description # for the effective adjuvant component.**

#(a) This may be different to that on the current authorised List Entry if a more specific or appropriate description

(b) Avoid use of generic terms such as 'polysaccharide', 'ethylene oxide condensate' and 'mineral oil' in proposing a common name. Acceptable examples of 'specific' common names are: 'polyoxyethylene [20] monolaurate', 'polyethoxylated tallow amine 15EO'.

(c) 'EO' and 'PO' should be used to denote number of moles of ethylene oxide or propylene oxide if appropriate to the product.

(d) Aspects such as chain lengths and ranges of molar mass should be fully described where appropriate.

5. **Please provide a molecular structure or structural formula for the effective adjuvant component (below or if necessary, on a separate referenced sheet).**
